

How to Integrate and Manage Alerts with WatchTower and Mainframe Data Sources

Matheus Milani | Broadcom AIOps Product Manager
Machhindra Nale | Broadcom AIOps Solution Architect

Monday, February 23rd - 1:15pm - 2:15pm EST
Salon 21

Before products, architecture, APIs and data, let's talk about.....

... The 3:00AM Problem!!!

WAR ROOM -
SEV 1

"All good with CICS... must be Db2, call them!"

"This is not Db2 issue, call zOS...."

"Does anyone have access to the transaction rate metric?"

"What's the status? Resolved already?"

**Alerts, logs,
metrics, dumps,
etc.**

How do I start?

**START FROM
SCRATCH**

Mainframe Observability.....

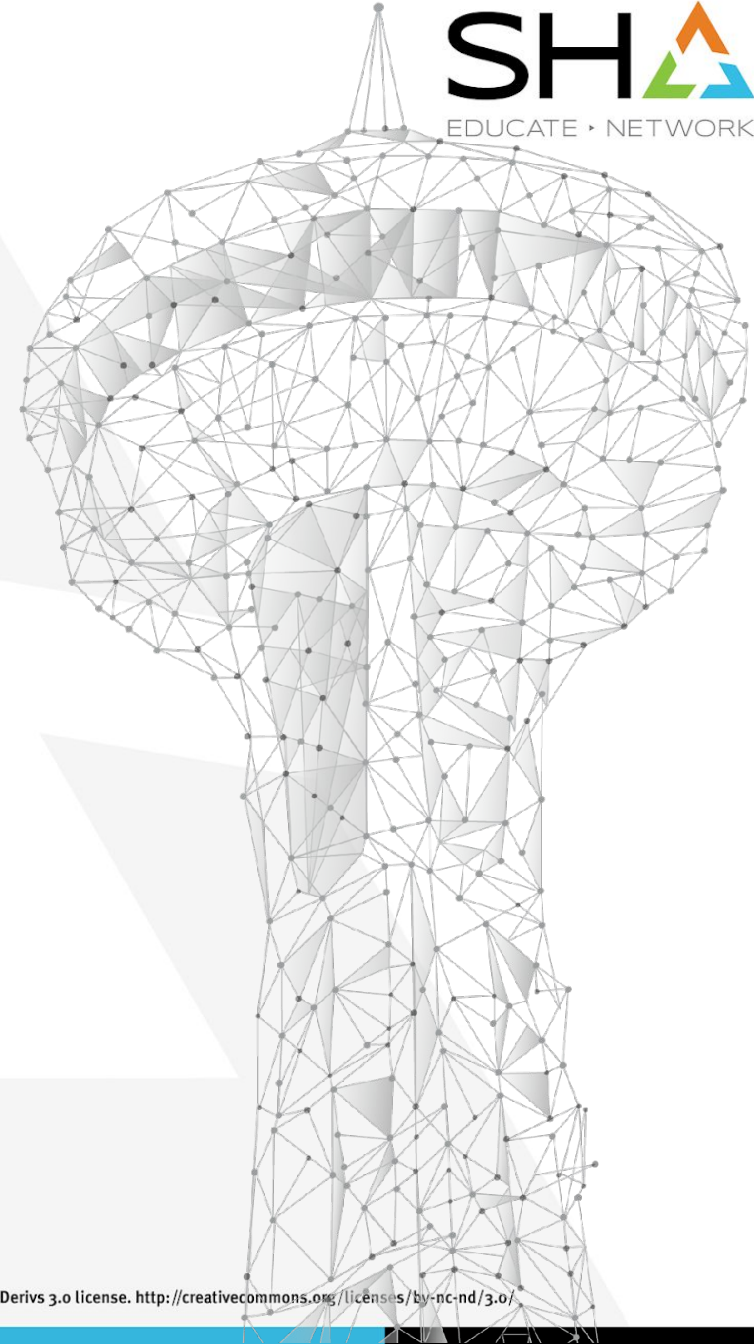

*is the evolution of monitoring from **"What is broken?"** to **"Why is it happening?"** It breaks down silos between performance, network, storage, automation, etc to transform fragmented telemetry into a single, navigable story of system health.*

Premier Observability Solution

A unified, user-friendly experience catering to various skill levels

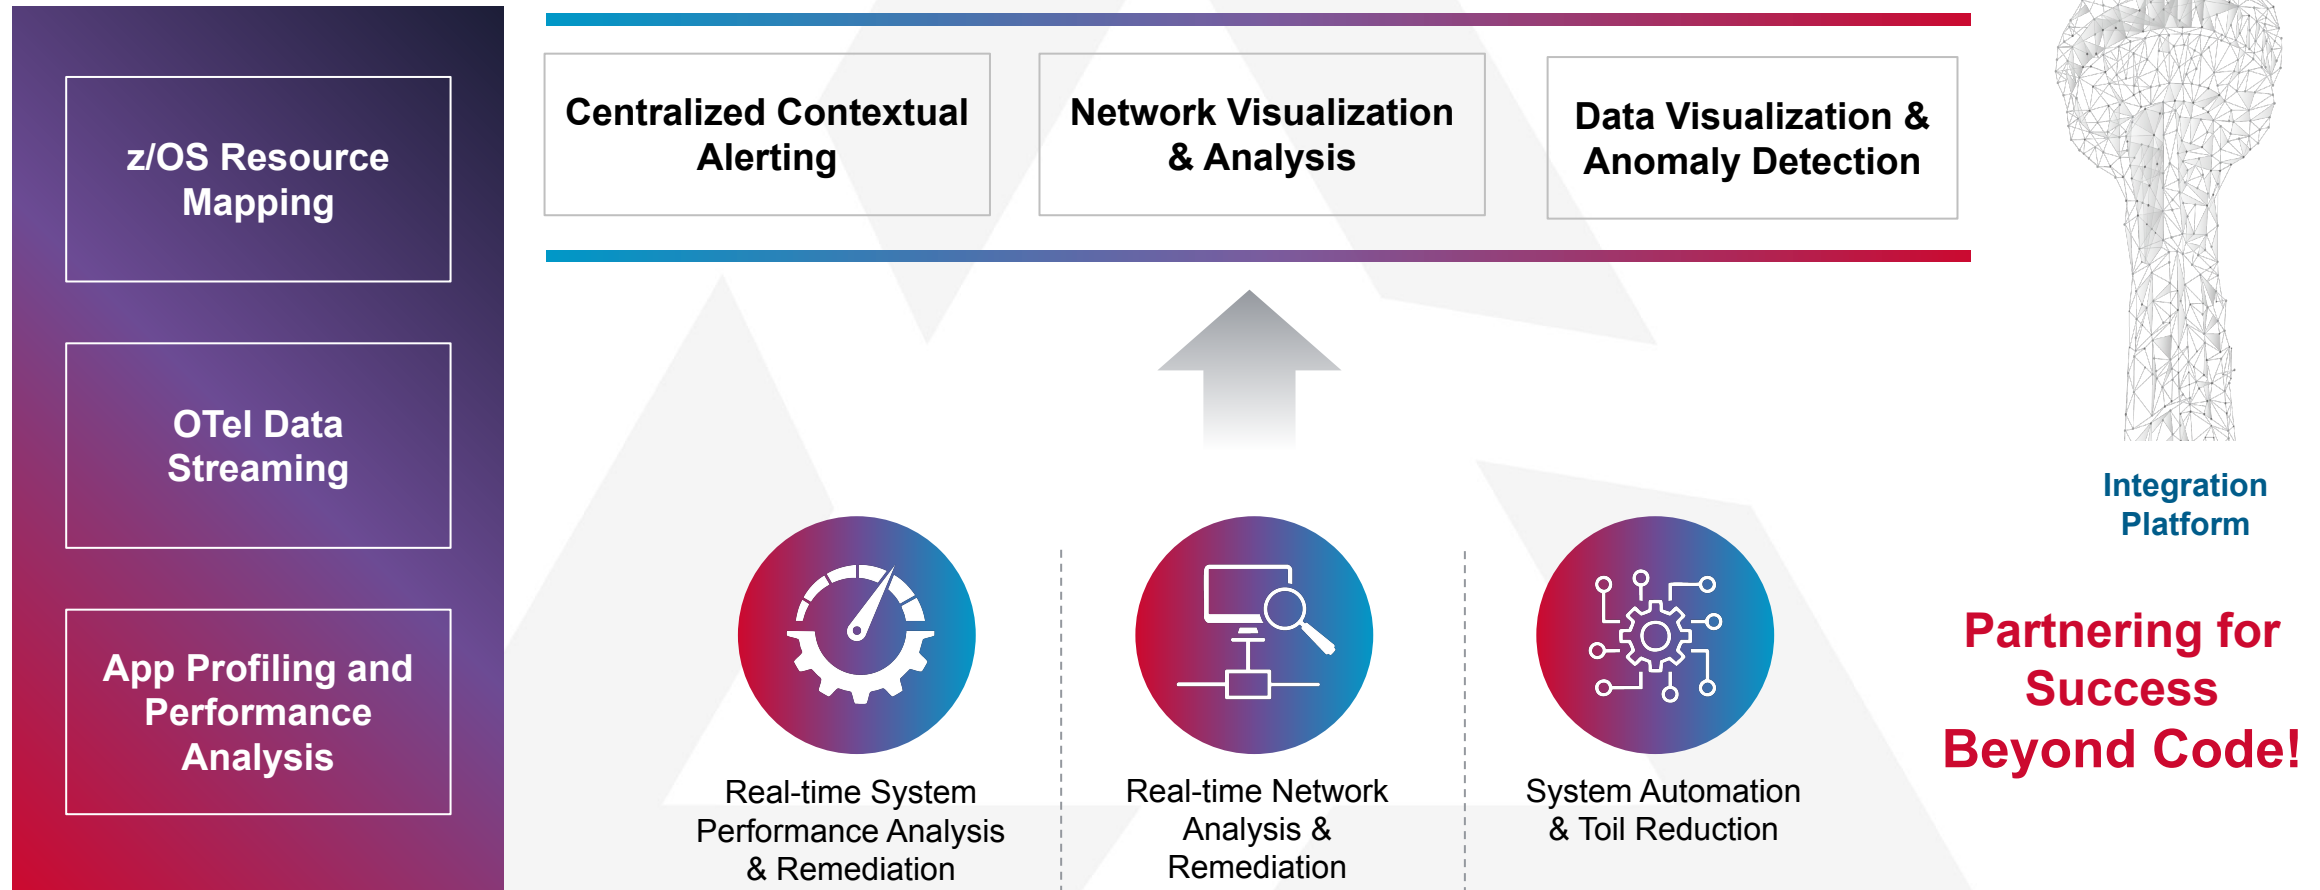

- Integrated context and insights
- Efficient, streamlined workflows
- Customized to the needs of various roles
- Improved visibility to enterprise tools

Enabling a shift from reactive recovery to proactive avoidance

Observability - Build Incremental Value

Shift from reactive recovery to proactive avoidance

Contextual Insights

SYSVIEW

OPS/MVS

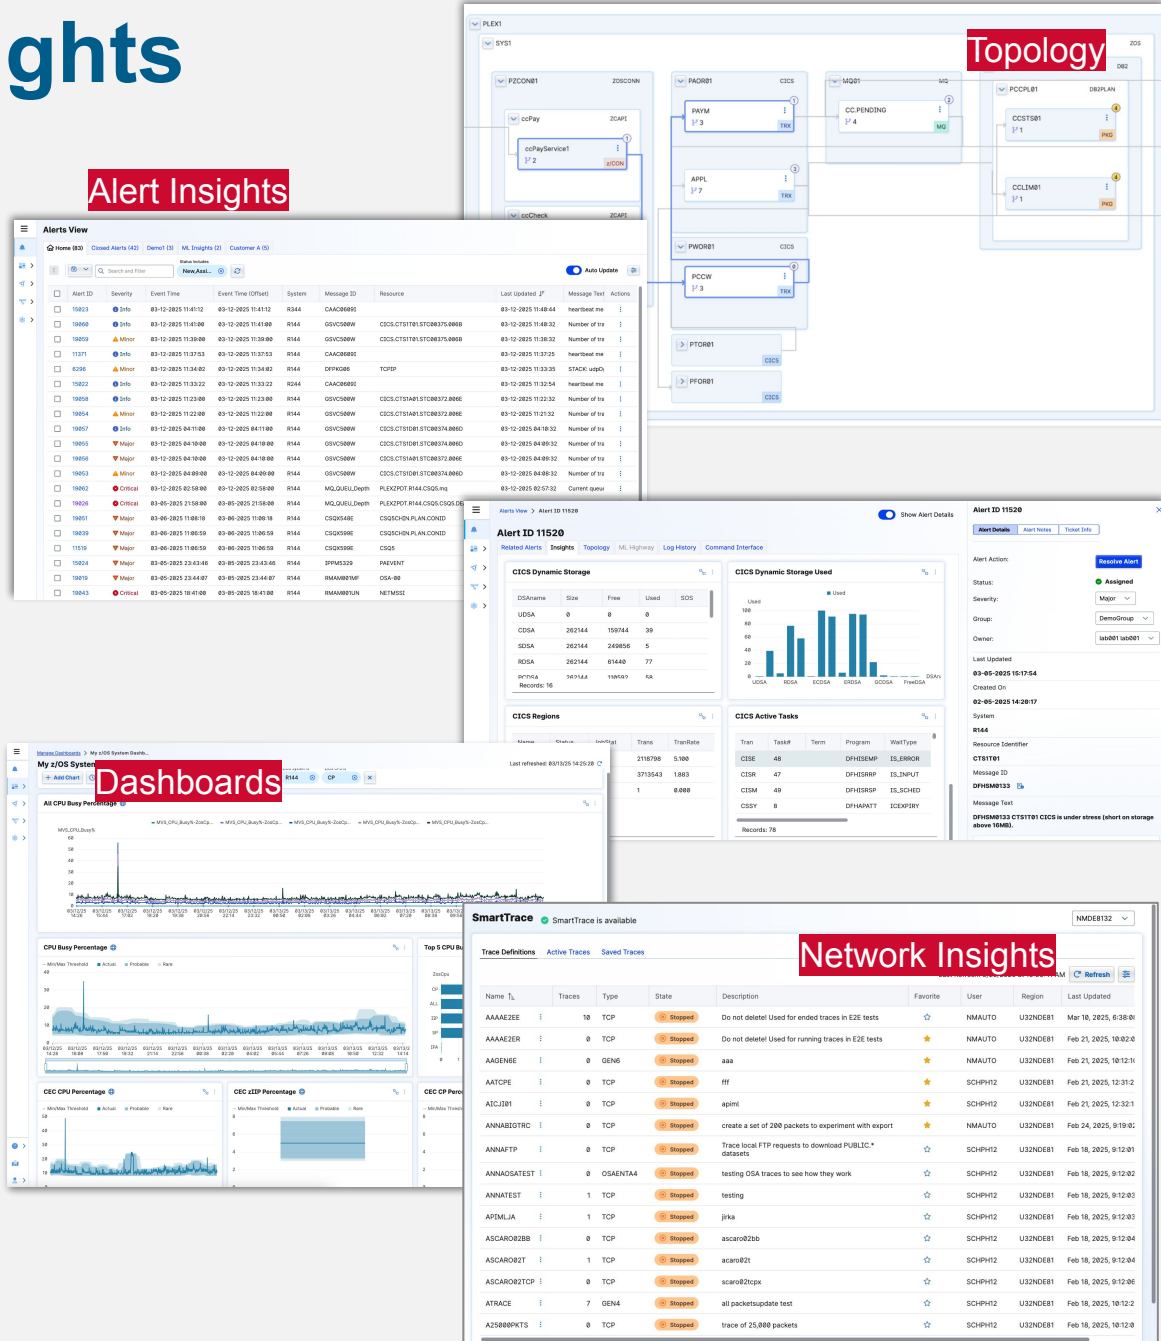

NetMaster

Vantage

MAT

SMF

Data Correlation (metrics, logs, alerts)
