

BYOD Lab - AI Enabled Proactive Monitoring to Get the Most From Your System With IBM Concert for Z

Domenico D'Alterio – Principal Product Manager – IBM
Fabricio Miatto – Forward Deployed Engineer – IBM

OVERVIEW

Simplify Mainframe Operations with IBM Concert for Z

IBM Concert for Z

Streamline mainframe operations with AI-powered efficiency

Focus on what matters

Address issues and warnings across IBM Z that have been grouped, ranked, and prioritized for effectiveness and clarity.

Reduce MTTR of issues

Quickly identify issues root cause and assess the impact through anomaly detection topology and data visualization - all from a unified, centralized platform.

Close your skills gap

Gain complete awareness of operational health, pinpoint problems instantly, and access built-in expert advice and actionable recommendations at your fingertips.

Powered by
AIOps for IBM Z

Detect

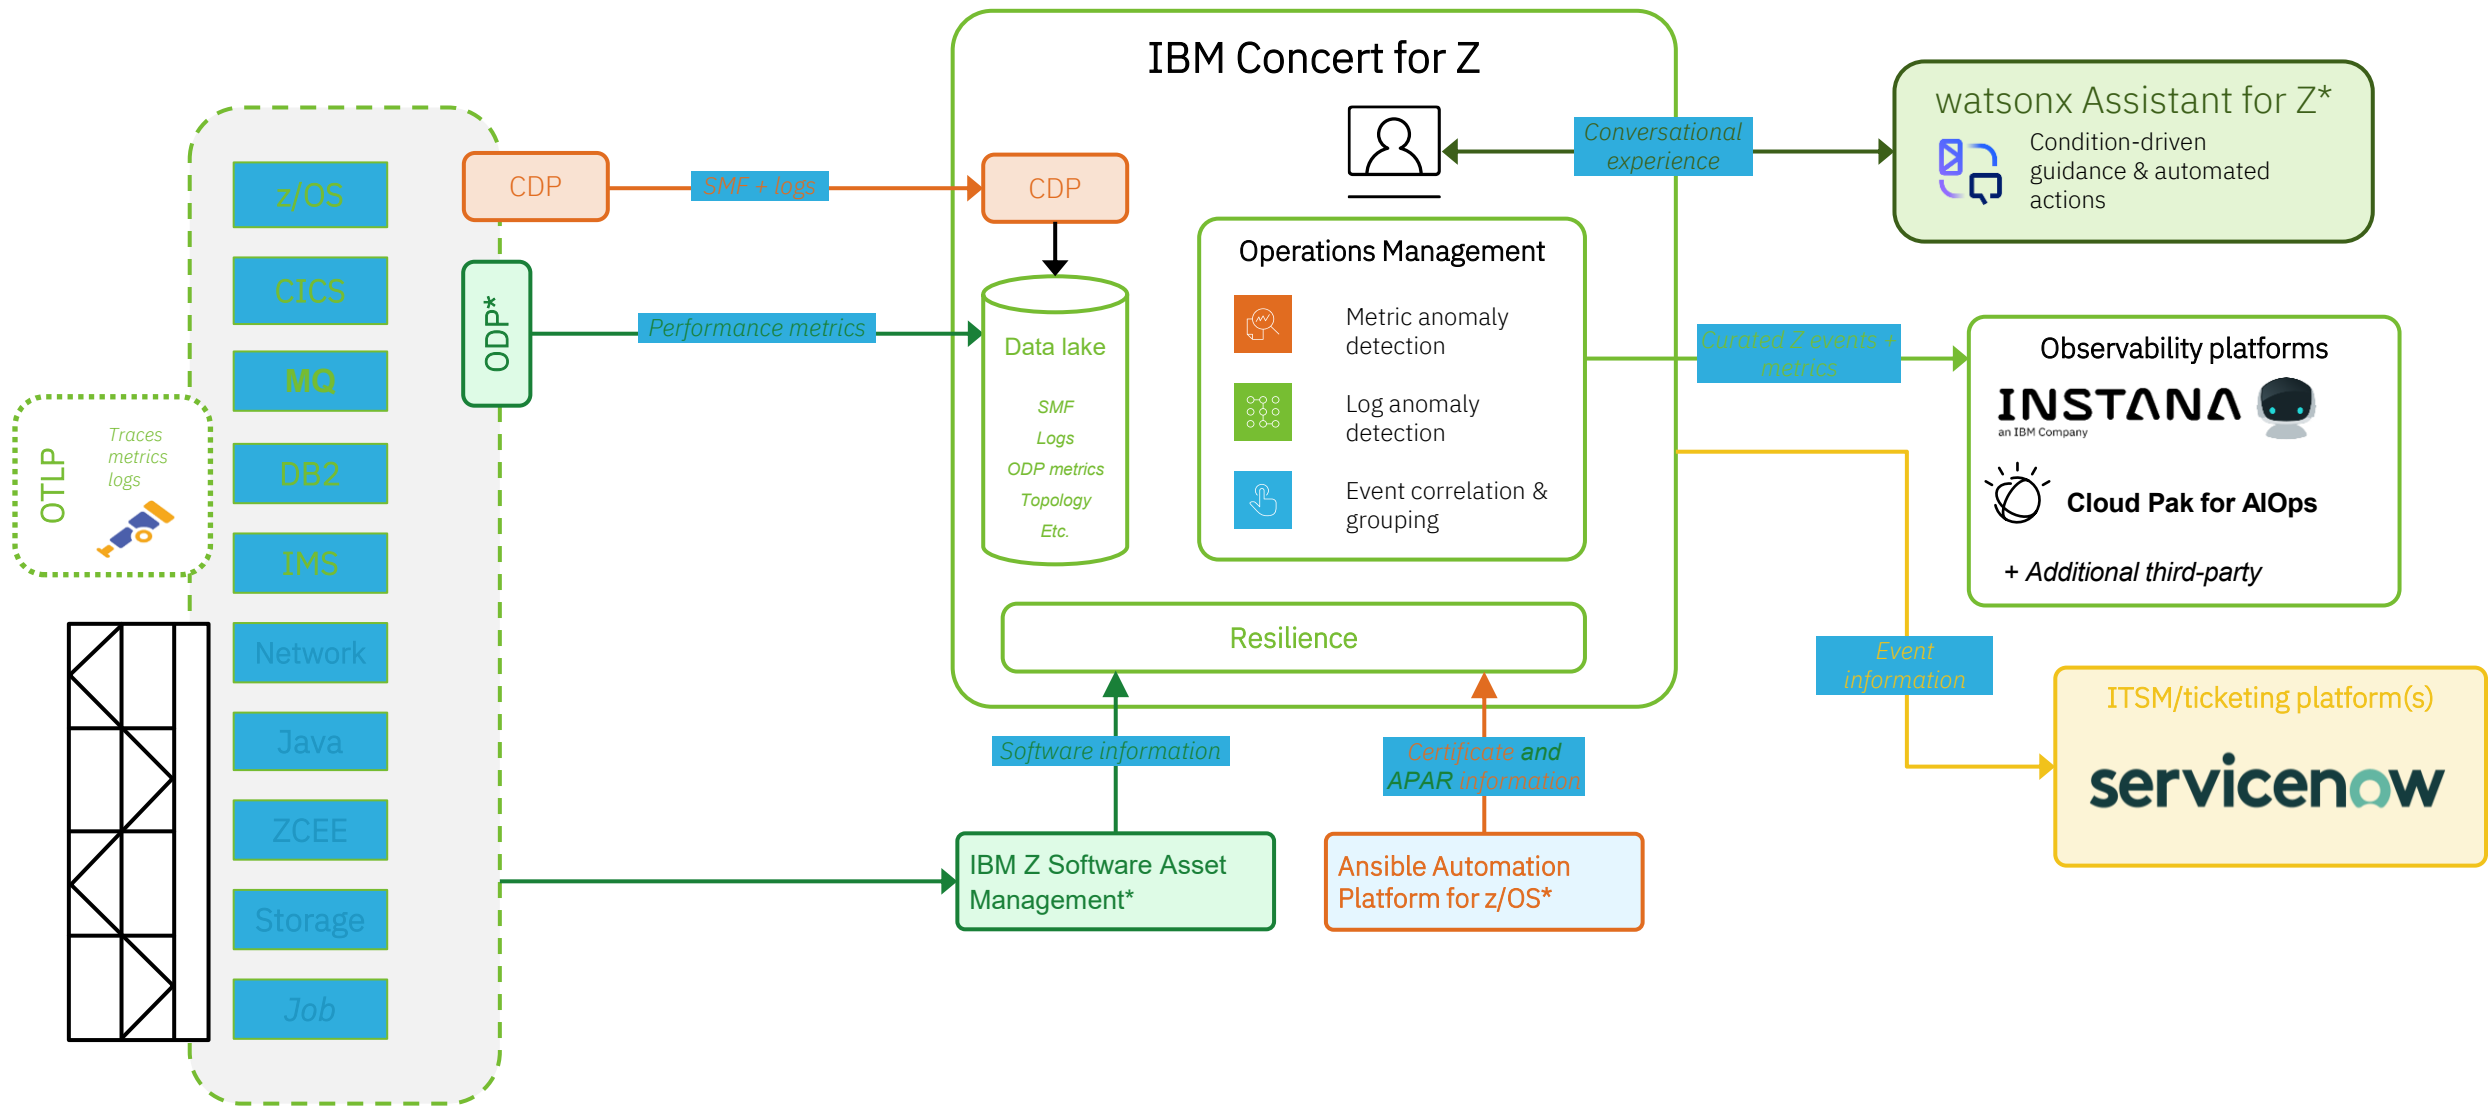

Decide

Act

IBM Concert for Z High level architecture

*Not included with IBM Concert for Z. Required software to enable specified use case.

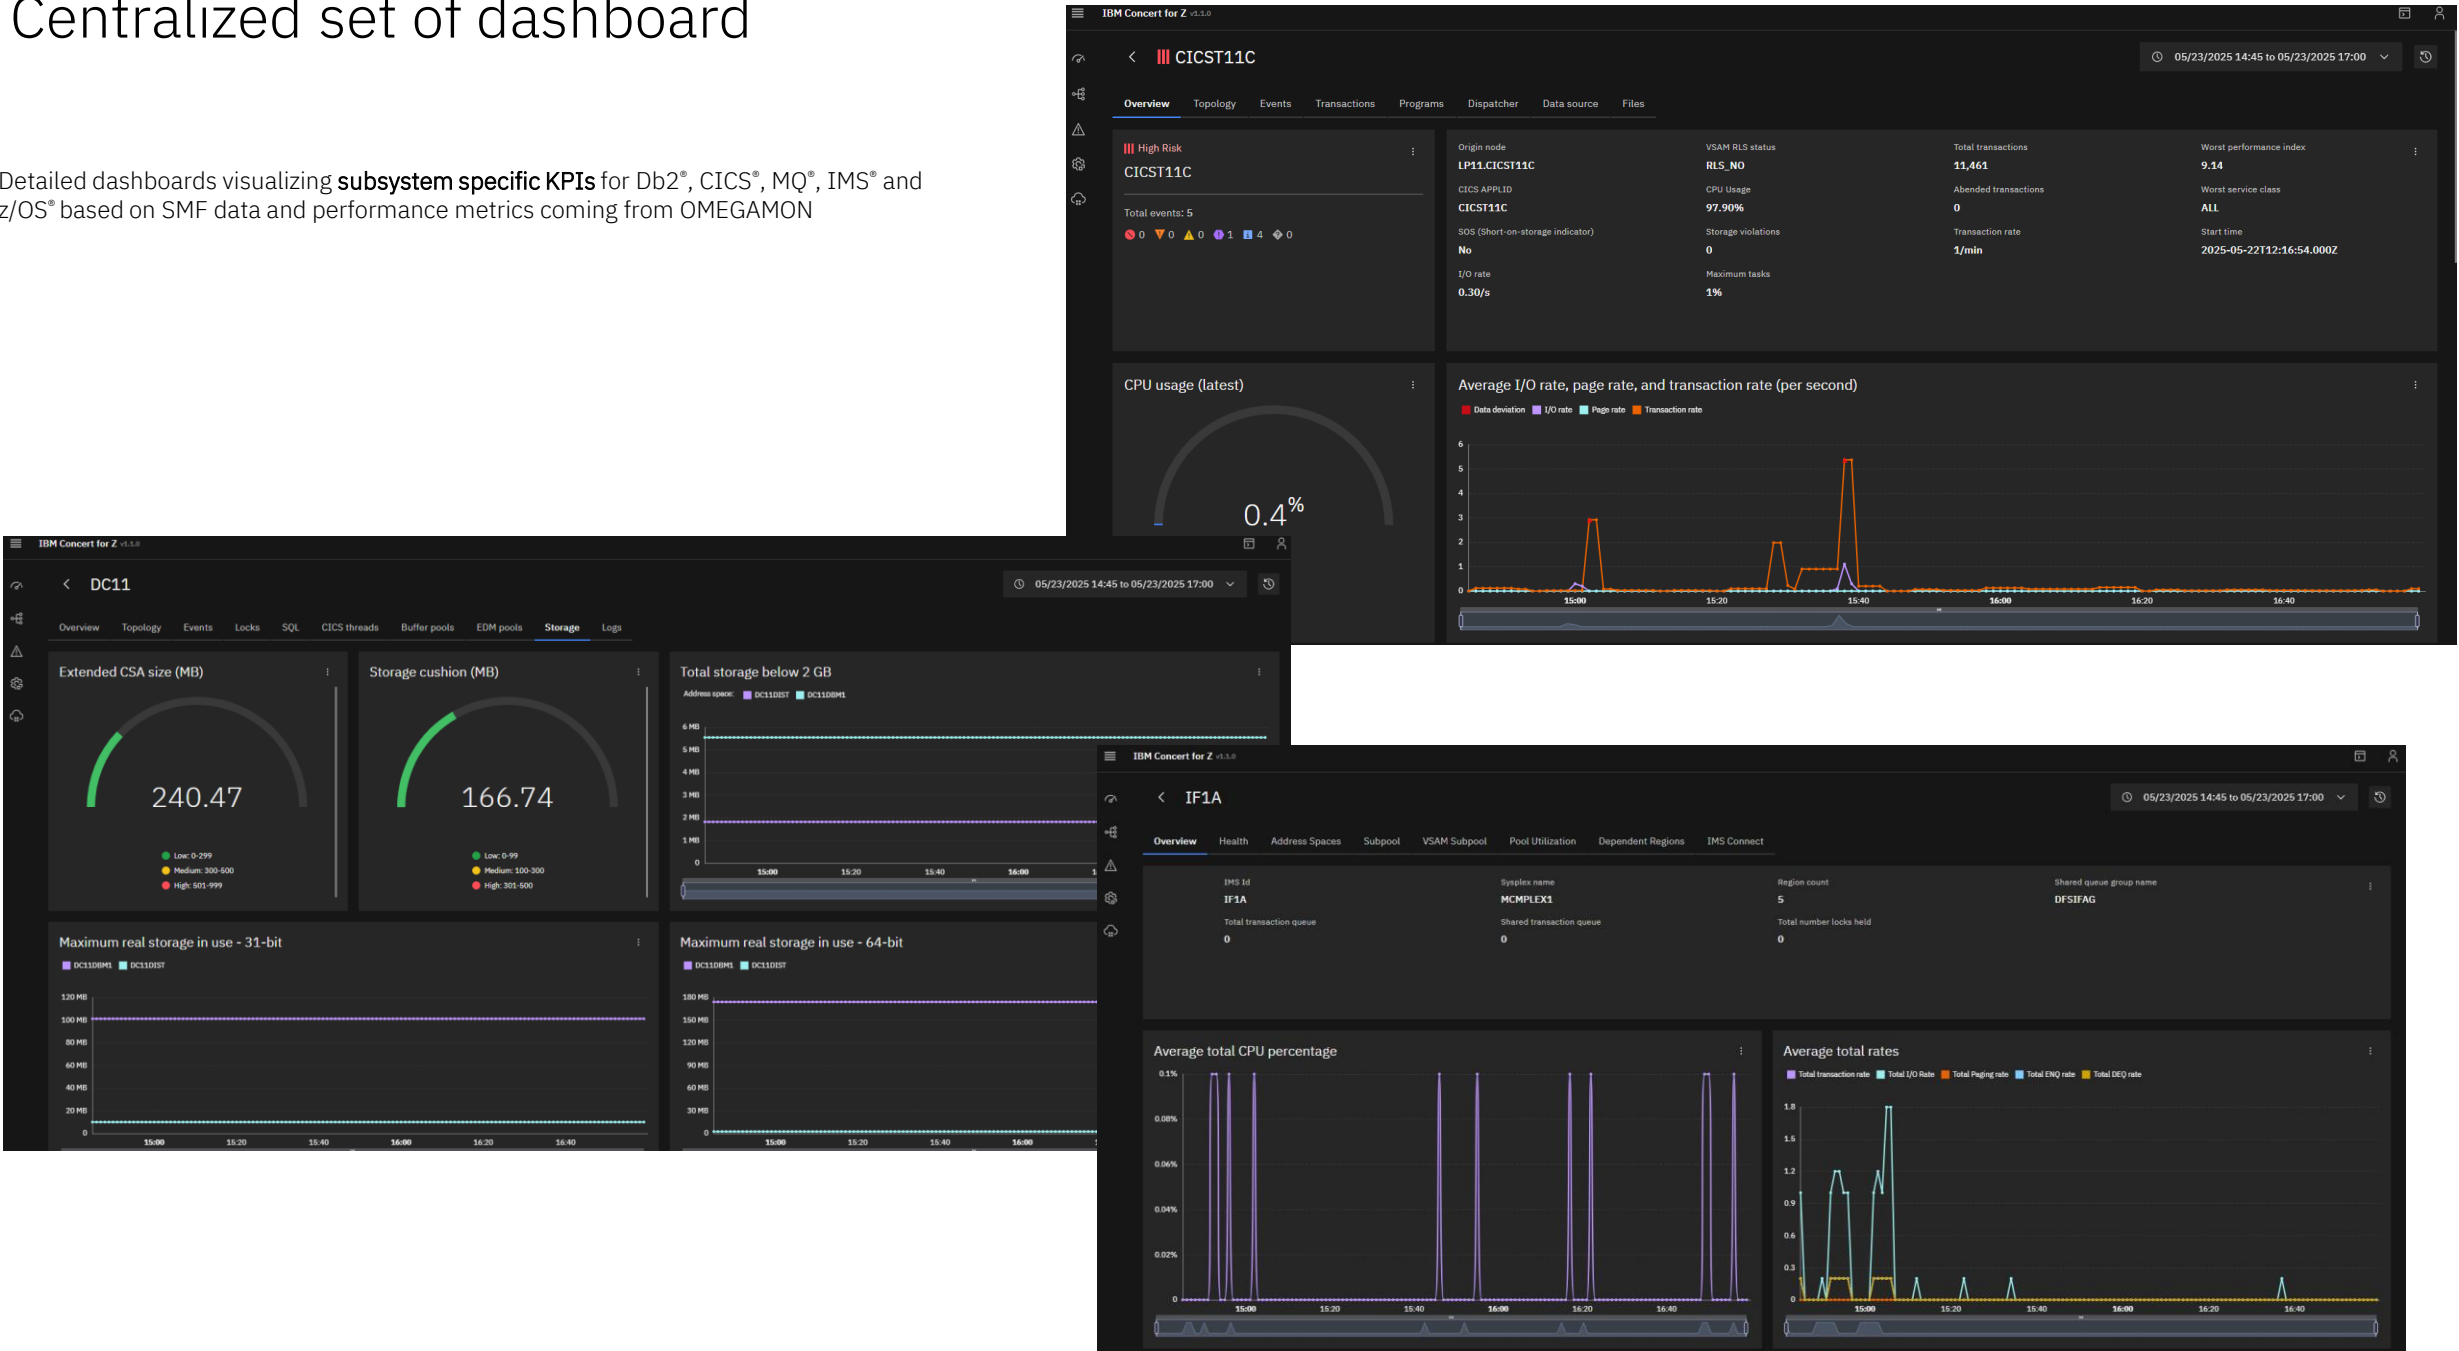

Built-in event grouping for noise-reduction

Issues, events, and alerts across IBM Z are aggregated, correlated, grouped, and prioritized by risk level to help identify critical risks

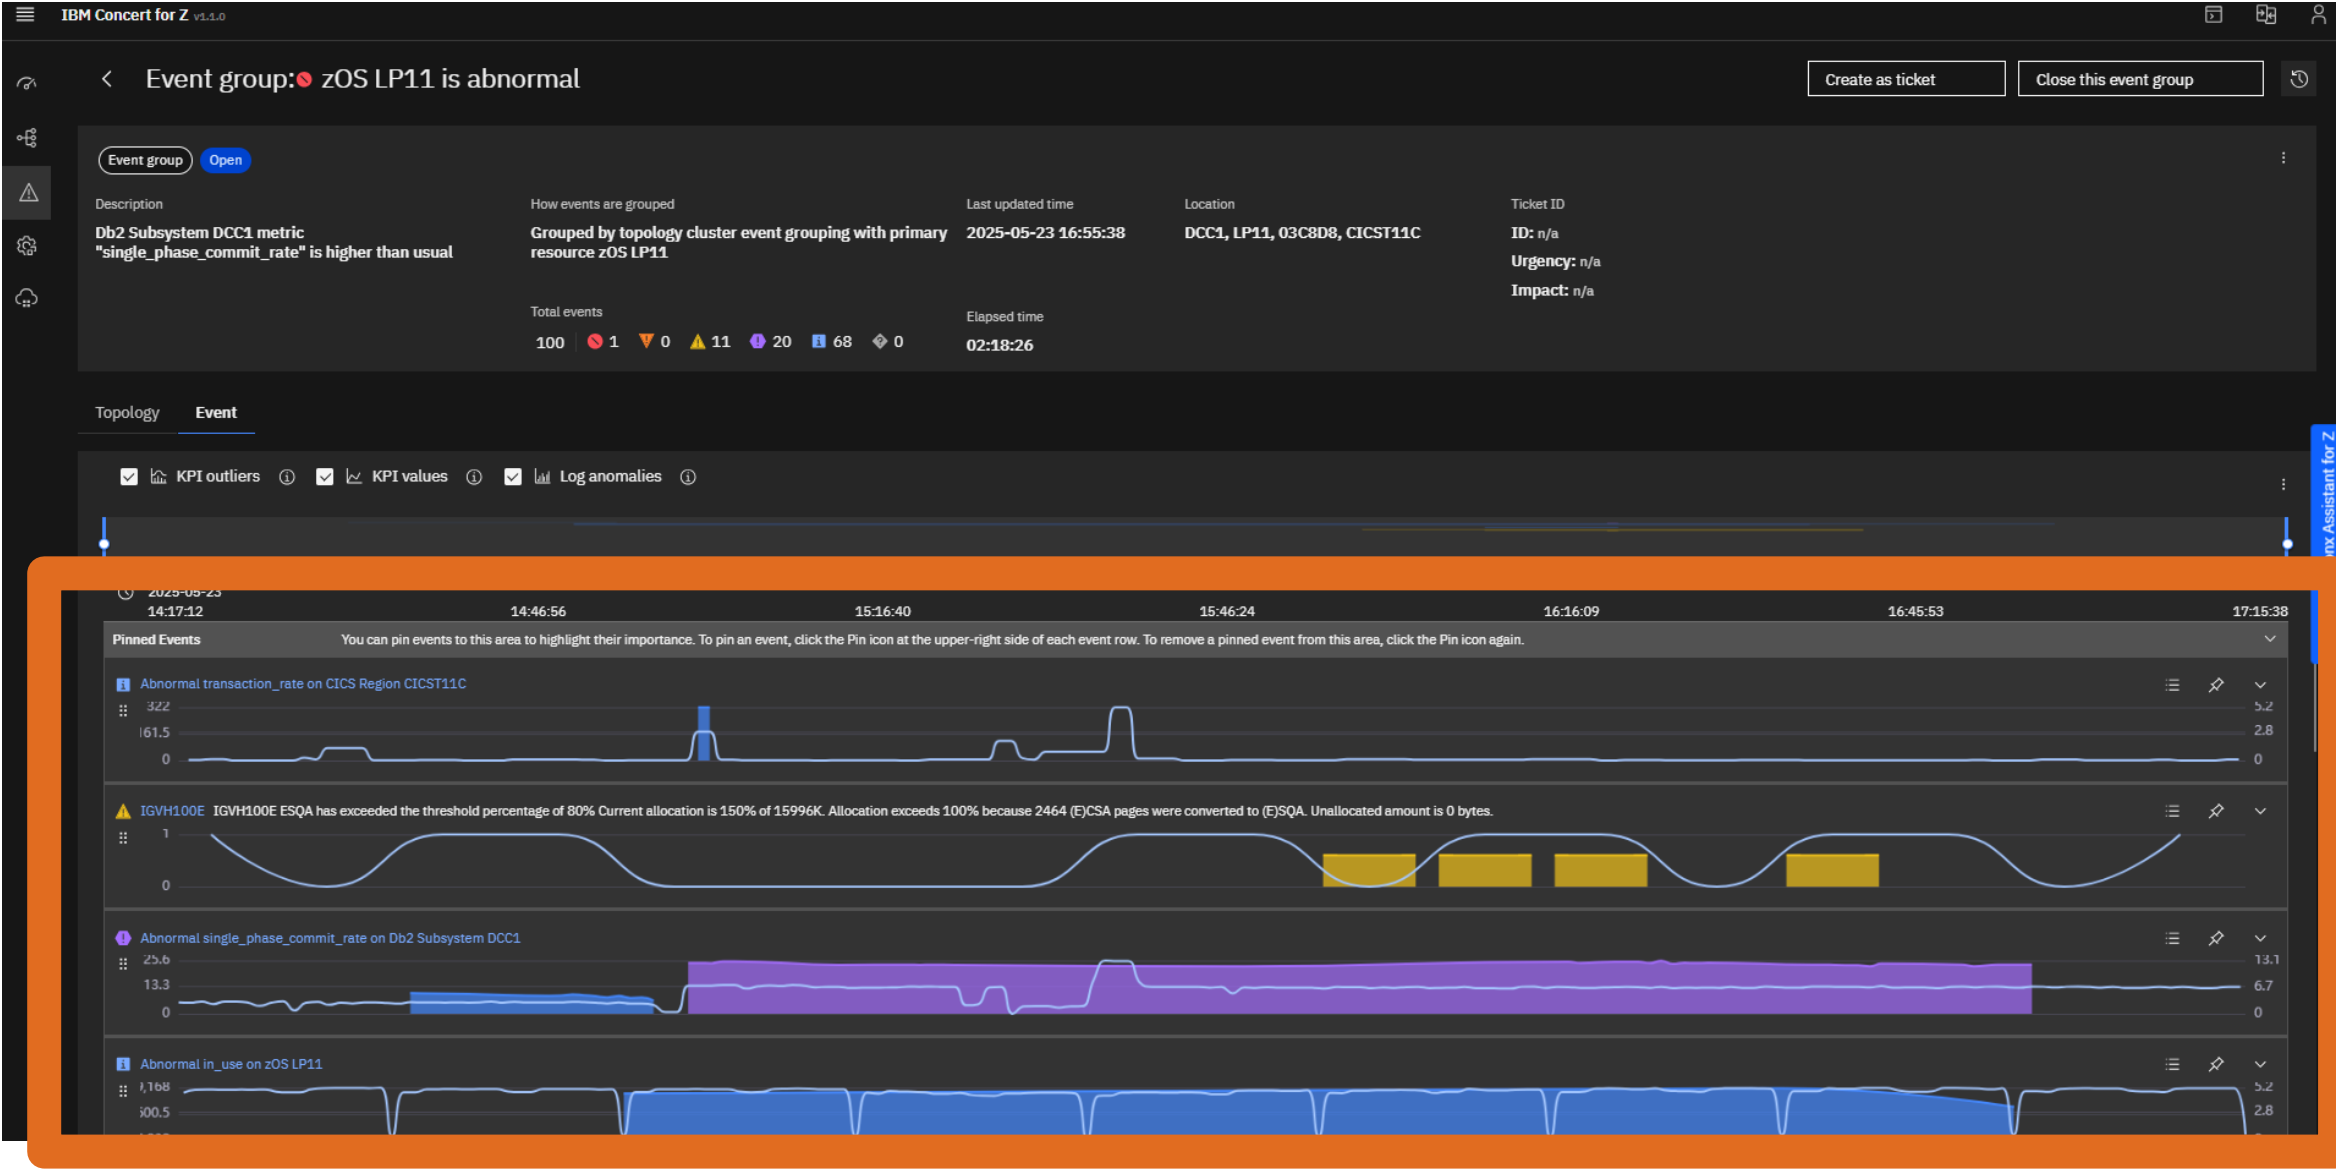

Centralized set of dashboard

Detailed dashboards visualizing **subsystem specific KPIs** for Db2®, CICS®, MQ®, IMS® and z/OS® based on SMF data and performance metrics coming from OMEGAMON

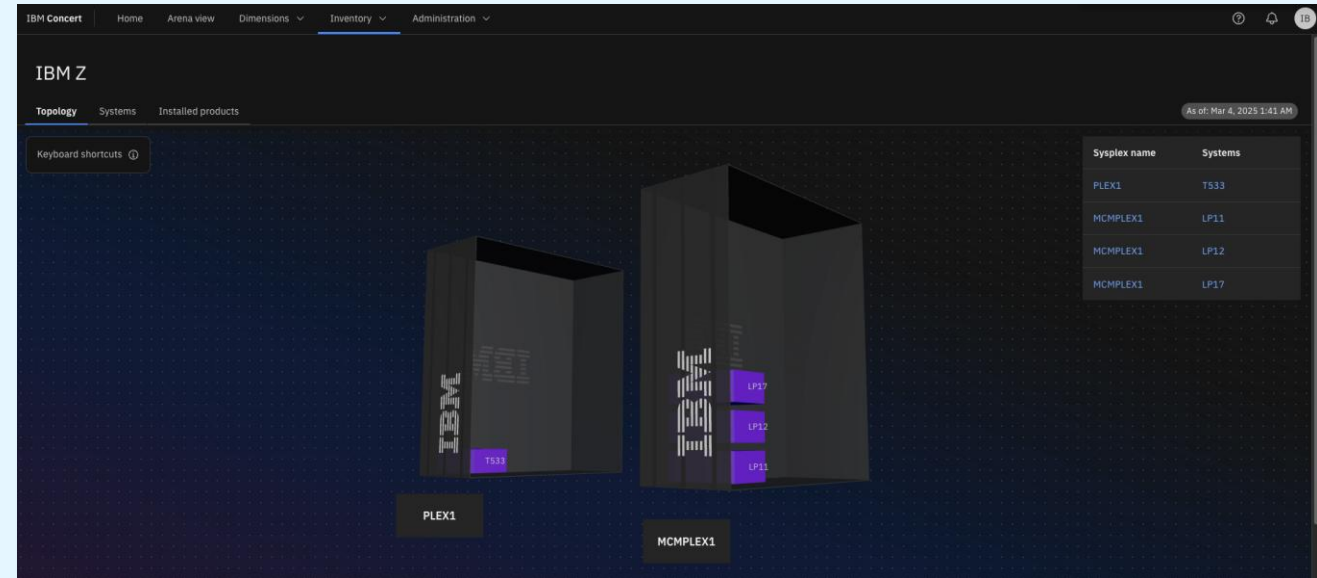

Event group analysis

Anomalies on metrics and messages coming from **different subsystem** visualized over a **timeline** for quick comparison and analysis

Visualize and manage IBM Z Maintenance Risk

Assess enterprise posture regarding APAR status and form plans to remain resilient and avoid outages

Never suffer an outage due to unapplied maintenance again

Track maintenance drift across all z/OS environments

Visualize APAR and/or HiPER risks, prerequisites, and relationships to clearly define your software upgrade roadmap

Auto-initiate risk-based change tickets to kickoff installation with the proper IBM Z focal or through automation Agents
