CloudLab

Flexible, scientific infrastructure for research on the future of cloud computing. Researchers use CloudLab to build their own clouds, experimenting with new architectures that will form the basis for the next generation of computing platforms.

[Request an Account](#)

Build Your Own Cloud ...

CloudLab provides researchers with control and visibility all the way down to the bare metal. Provisioning an entire cloud inside of CloudLab takes only minutes. Most CloudLab resources provide hard isolation from other users, so it can support hundreds of simultaneous "slices", with each getting an artifact-free environment suitable for scientific experimentation with new cloud architectures. Run standard cloud software stacks such as OpenStack, Hadoop, and Kubernetes. Or, build your own from the ground up. The bare metal's the limit!

CloudLab is built from the software technologies that make up Emulab and parts of GENI, so it provides a familiar, consistent interface for researchers.

[Learn about the technology](#)

... On Our Hardware

The CloudLab clusters have almost 1,000 machines distributed across three sites around the United States: Utah, Wisconsin, and South Carolina. In addition, it provides access to a number of federated facilities around and outside of the US. CloudLab is interconnected with nationwide and international infrastructure from Internet2, so it is possible to extend private, software-defined networks right to every server.

CloudLab interoperates with existing testbeds including GENI and Emulab, so you can take advantage of hardware at dozens of sites around the world.

[Take a look at the hardware](#)

Duplyakin et al. (2019)

2.4 Resource Availability

Availability and diversity of resources play critical roles in the adoption and continued use of a testbed or other IaaS facility. **If users' needs frequently cannot be satisfied due to insufficient availability, those users will likely move to other facilities.** Users also tend to seek out hardware with cutting-edge features and the highest performance characteristics. New hardware types have been introduced to CloudLab over time in order to satisfy both capacity and the capability requirements. Not only did the new hardware attract new users, but it also reduced contention for older, already deployed resources.

Project

Cluster(s)

Number of Days (Optional) If you tell us how many days, we will find a slot and set the Start/End for you.

Reservation Start (Optional) ⓘ

Reservation End

Reason

Is this reservation for a class (used by more than just yourself)? Yes

\$ \$ \$

By understanding user behavior,
you can more effectively guide it.

(Thaler & Sunstein, 2009)

Duplyakin et al. (2019, p11)

“A fairly large number of reservations [had] no identified usage...”

By understanding user behavior,
you can more effectively guide it

...toward responsible node use.

Observed typical tasks

Interviews for more depth

Observed typical tasks

“Can you tell me about your first interaction with CloudLab?”

“Can you tell me about a time where you’ve been frustrated while using Cloudlab?”

Gathering valid data

Observed typical tasks

“Can you tell me about your first interaction with CloudLab?”

“Can you tell me about a time where you’ve been frustrated while using Cloudlab?”

Thematic analysis

1. Label data

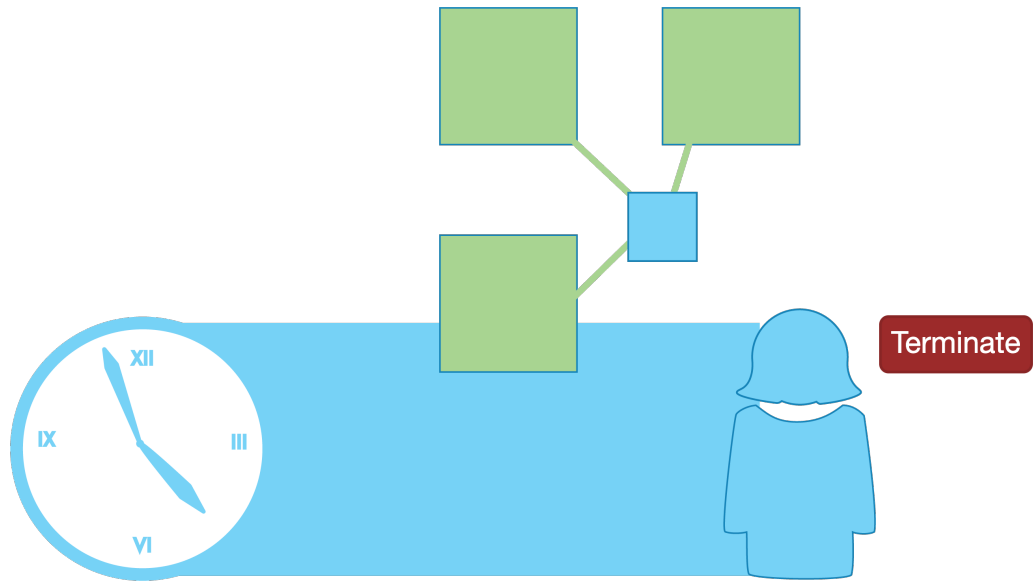

to be used from others. Yeah. Okay, now, another thing that I was, because now we're, of course, we're waiting to see, this will take time for the notes to become available. But one of the issues that I was facing with Cloud Lab, I think I have two issues. I don't know if it's a good time to talk about it now, or Okay, so two issues, the first had to do sometimes, there are some connectivity issues with a node. So it could be the case that when I, for example, register to have, let's say, I want four nodes, okay, so if I register for four nodes, sometimes randomly, especially in the past. Now, I haven't seen it for a while because I'm

13:13 Okay, ...
Preparing nod...to be available

13:14 the first had to...
Feeling frustra...g experiments
Feeling frustra...e than needed
Time as resource
Workaround:...es than needed

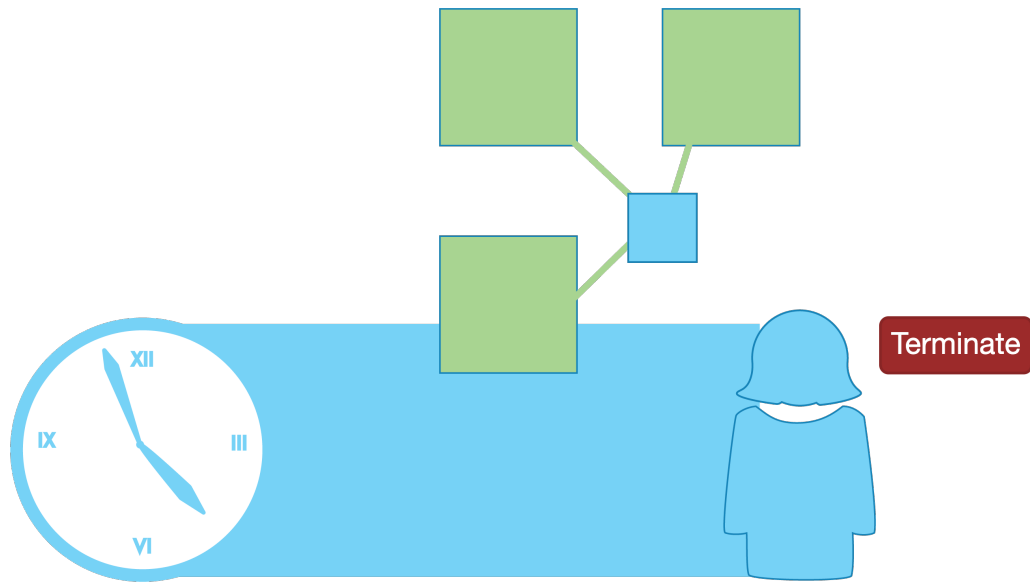

“As an avid user of CloudLab, I know how difficult sometimes it’s- it is to get those nodes. . . As a courtesy for other users, we just try to. . . delete the reservation once it’s done.” - P4

“I tell it to them in my instructions, you know.... ‘Make sure you delete your resources.’ The last question on the lab assignment is, ‘Upload a screenshot showing that you deleted your resources.’”- P10

Experiment cannot be extended before the reservation ends 13 views

@umich.edu

Hi, I have a reservation till November 29. But my experiment created on Nov 9 can not be extended

Leigh Stoller

Hi. Reservations are per-project. Looks like other members of your project are using some of the same

@umich.edu

to cloudlab-users

I see. Thanks!
